- Interactive Traffic Director (WHERE)
- Realistic simulation of the line 100 (Museum Line)
- Munich copilot (doesnt work at all)
- OCC (Operations Control Center) This is a special name for the main menu.
- Interactive radio communication with the dispatch center (Doesnt work as copilot crashes game to desktop)
- Original announcements (Doesnt work as the Copilot crashes the game to desktop)

Couple of other issues Ill put out there when the game first loads up there is a loading screen that has 4 unlabled buttons 3 red one green the dont appear to have any purpose other than making you hit the green button to start the loading screen. The graphics are grainy and ugly at high resolutions, shadows from your character appears as a black blob at your feet, that blurs out your lower legs. I havent put a lot of time into the game as it still doesnt work for me. It just crashes when I try to select a route from the copilot. I have verified the game cache I deleted and re-downloaded, ran as administrator, shut down steam ran as administrator. If i dont use the copilot I can drive around town without purpose as passengers will not get in the bus, GPS function and all the major features are connected to the copilot, but since this function doesnt work no functions work.

I love driving simulator games, but this one isn't up to par with the rest of the driving sims I've played. At all.

It's hardcore, yeah, lots of crap you have to do to get the bus running. Here are a list of some of the things that make me really regret getting this game.

- Terrible, TERRIBLE textures. I put this on the highest settings and textures such as the cement are still extremely blurry.
- Controls are weak. For example, pressing A and D while walking around turns your character instead of making him walk sideways.
- Lighting is not good at all. The screenshots on the store page were either edited or something else.
- People walk. That's all they do. Walk. And then they walk through each other.
- Models are terrible. Blurry, and ugh, just terrible.
- Not much to do at all. I mean, come on. Driving a bus. That's it. At least in games like ETS2 you can manage a trucking business, upgrade your buildings, and freely drive around Europe all you want.

When I play a driving simulator, most of the time it's just to relax. I can just sit back, enjoy the good graphics of the game, enjoy the scenery, all that stuff. Euro Truck Sim 2 does a good job at that. But this one doesn't do a good job. At all.

If you're one to like switching on A/C in a bus to make sure your passengers are comfortable, by all means, buy the game. In all seriousness, I wouldn't recommend this game to anyone. Not at \$34.99, not at \$4.99. It's not a good simulator at all.

I've already had multiple crashes and I don't think that's a problem with my computer. I've never had crashes with other games. I'm really regretting buying this.

If you want to check out the game on YouTube, search "City Bus Simulator 2 Munich", because that was originally the name of the game. It's been out for a couple of years, but I would really just wait for another bus simulator. Don't purchase this one.

(If you really want a good driving simulator on Steam, go with Euro Truck Simulator 2. It is boss.)

DO NOT BUY!

This game is broken. Using the copilot crashes the game to the desktop. Without the copilot, the game cannot be played. This crash makes the game completely unplayable! COMPLETE WASTE OF \$27.99

AGAIN, FOR THE LOVE OF GOD, DO NOT BUY!
